## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable Pak in view of Wooderson.

Pak discloses the use of a speaker diaphragm having a generally cone shape, comprising a plurality of projections (11) forming a periodical structure along a circumferential direction in a slanted area of the speaker diaphragm, each recess with a bent portion (claim 2) in radial direction (claim 3) extending radially from a central area to an edge portion and curving along the circumferential direction as the speaker diaphragm comes near to the edge portion, and a plurality of recesses (12) formed between the plurality of projections.

Pak does not disclose the use of a surface that is curved in an area from each projection.

Wooderson et al discloses the use of a speaker diaphragm having a generally cone shape, comprising a plurality of recesses on surface that is curved in an area from each projection to each recess.

The device taught Pak forms a screw propeller shape (see figure 3)(claim 5).

09-720028

Regarding claim 4, the bottom area of the recess as taught by Wooderson et al is thicker than another area (see figure 7)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the speaker as taught by Pak with the recesses as taught by Wooderson in order to permit an efficient means of transmitting sound.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sawafuji and Faraone disclose the use of speaker diaphragms.

4. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956.**
